15 June 1987

Administrative Communications

ESC ADDRESS DIRECTORY (U)

(FOUO) This regulation is the primary source document for mail, message, and ARFCOS addresses of ESC organizations. Use this regulation with AFR 10-4; AFR 10-6; AFR 700-31; The DIA Compartmented Address Book; and ESCR 100-24. This regulation applies to ESC-gained Air Reserve Forces.

NOTE: (U) The overall classification of this publication is **CONFIDENTIAL** because it gives all ESC unit locations and the collective organizational structure of this command. Safeguard this information according to DOD 5200.1-R/AFR 205-1.

Part One	General Information
Part Two	Organizational Index
Part Three	Address Listing
Part Four	HQ ESC Categorical Addresses and Address Indicating Groups (AIGs)

PART ONE-GENERAL INFORMATION (U)

1. (U) About This Regulation. HQ ESC/DAQS will update this regulation as required and will include all inputs received since the last change. This directory is a listing of HQ ESC and ESC organizations. Detachments and operating locations are listed in organizational sequence directly after their parent units.

2. (U) Direct Address Procedures. Use the simplified address elements shown in this regulation on all mailing containers and communications. If the office symbol is not known, use the appropriate major or staff-element symbol shown in AFR 10-6.

3. (U) Procedures. Use these procedures for selecting the correct message address for units within this command:

a. (U) GENSER. This type traffic is identified as "collateral" material and can be both classified or unclassified; that is, Top Secret, Secret, Confidential, UNCLAS EFTO, or Unclassified. Include the complete geographical location in the "TO," "FROM," or "INFO" lines of the DD Form 173, Joint Messageform.

b. (U) Defense Special Security Communication System (DSSCS). This type traffic is identified as containing a caveat which must be protected thru secure channels. DO NOT include the geographical location in the "TO," "FROM," or "INFO" lines of the DD Form 173.

Supersedes ESCR 10-6, 28 March 1986. (See signature page for summary of changes.)

No. of Printed Pages: 117

OPR: DAQS (Patricia A. Campbell)

Approved by: Lt Col R. C. Diekmeier

Editor: Jane L. Weddle

Distribution: F; X: (See page 115.)

c. Using Instead of Administrative Designators. Only use

Do not use when sending messages within ESC, even if other cryptologic services or agencies are listed as information addressees; instead, use unit administrative designators like 6917 ESG, 6948 ESS, and HQ ESC/DOQ. If there is still a doubt as to when to use or administrative designators, other than on reports, then use the administrative designator.

4. (U) Address Changes. Each organization is responsible for promptly notifying HQ ESC/DAQS when a change in address occurs. Parent units are responsible for submitting complete address information for subordinate units being activated, deactivated, or whenever a change occurs.

Messages

TO: AIG EIGHT FIVE FIVE FIVE//DA//
SAC OFFUTT AFB NE//DA//

2. (U) Functional Address Symbol). Show the appropriate office symbol of the intended recipient after the AIG designator or two spaces below the categorical address.

3. (U) Distribution to Units Below Squadron. If direct distribution to a detachment or operating location is desired, add the organization to the address element. (Otherwise, a parent unit is responsible for disseminating information received in a letter.)

4. (U) AIGs May Be Used Only for Non-SCI Communications. DSSCS address groups (DAGs) are used for addressing SCI messages. Contact DO for listings of DAGs.

5. (U) Special Instructions.

a. (U) Field units will not use the established AIG 8552 identified in this regulation. Those subordinate units having a need to establish their own unit AIGs must submit their request to HQ ESC/DAQ outlining the proposed distribution of the AIG and must further provide justification for the establishment of the AIG.

b. (U) At HQ ESC, established AIGs may be used (interchangeably); however, when an office uses an AIG of which it is not the assigned OPR, it must coordinate the message or correspondence with the OPR for the AIG they are using. **EXCEPTION:** See AIG 8552 instructions on page 108 of this regulation. When preparing AIG 8552 or 8553 messages and letters requiring wide dissemination, reproduce the number of copies shown for category address for the headquarters staff and colocated units. When the "TO" element of a letter is addressed to "ALL HQ ESC Staff Offices and Colocated Units," also reproduce the number of copies shown under these headings. This will reduce reproduction costs and provide adequate dissemination of information.

NOTE: (U) When preparing letters or messages for general dissemination, include a statement that "Additional reproduction of this material by HQ ESC staff offices and colocated units is prohibited unless approved by the originator."
